AMERICAN METAL WARE BY GMCW™

TAMPER RESISTANT COFFEE URNS

Project | Date | Model **67710(E)** | Item# | Quantity

model 67710(E)

Features

- Tamper resistant: all adjustable controls (timer, thermostats, sprayover flow control), are inside a lockable control box. Master on/off switch is behind a stainless steel, lockable panel. Control switches and pilot lights are protected behind a tamper resistant, 1" (2.54 cm) thick Lexan® cover plate. (Padlocks not included.)
- High volume: two independent brewing heads brew into the 10 gallon (37.9 L) liners simultaneously or independently. Brew heads are mounted under hinged lockable covers.
- Innovative indicators eliminate exterior parts. Indicator lights replace gauge glasses. Water hot light replaces thermometer. Completely internal air agitation system for each liner.
- Designed for safety - eliminates potential burn hazard with two layers of high density fiberglass insulated body.
- Urn can be fastened to counter top with flanged feet to prevent tipping or movement.
- Automatic refill and reheat of water compartment as needed.
- Low water cutoff system protects heating elements from burn-out, at start-up or in operation.
- Eliminates need for paper filters - equip with two permanent stainless steel brew baskets.
